

CATALOGUE NO. 6321.0

EMBARGOED UNTIL 11.30 A.M. 23 MARCH 1994

INDUSTRIAL DISPUTES, AUSTRALIA, DECEMBER 1993

MAIN FEATURES

In December 1993—

- There were 40 disputes reported involving 11,600 employees and the loss of 19,100 working days. This represents a decrease in industrial disputation compared to November 1993 when there were 55 disputes involving 54,400 employees and the loss of 40,100 working days.
- The Metal products, machinery and equipment manufacturing industry reported an increase in working days lost, from 6,100 in November 1993 to 10,000 in December 1993, accounting for 52 per cent of the working days lost.
- Victoria accounted for 58 per cent of working days lost in Australia during the month (11,000).

- Western Australia reported 100 working days lost, the lowest recorded for this State since December 1967 when no working days lost were reported.

In the twelve months ending December 1993—

- There were 610 disputes reported, the lowest recorded in a twelve month period since this series was first compiled in December 1981. These 610 disputes involved 489,600 employees and 635,800 working days lost.
- Victoria recorded a significant fall in working days lost, compared to the 1992 calendar year (586,400 to 257,200). In contrast, Queensland recorded the

INQUIRIES

- for further information about statistics in this publication and the availability of related unpublished statistics contact Laurie Mann on Canberra (06) 252 6572 or any ABS State office.
- for information about other ABS statistics and services please contact Information Services on Canberra (06) 252 6627, 252 5402, 252 6007 or any ABS State Office.

largest increase in working days lost over the same period (66,300 to 128,400).

In terms of working days lost per thousand employees in the twelve months to December 1993—

- There were 108 working days lost per thousand employees for Australia. This is the lowest figure recorded for a calendar year since this series was first compiled in December 1981.
- The Transport and storage; Communications industry, and the Mining (other than Coal) industry reported 42 and 317 working days lost per thousand employees respectively. These rates are

the lowest reported for these industries in a twelve month period since the series was first compiled in 1981.

- Victoria and Tasmania both recorded a significant decrease in working days lost per thousand employees, compared to the 1992 calendar year (369 to 169 and 285 to 29 respectively).
- Western Australia reported 51 working days lost per thousand employees. This is the lowest rate for this State since this series was first compiled in December 1981.

NOTES

Statistics of industrial disputes are compiled mainly from data obtained from employers (both private and public sector) and trade unions concerning individual disputes, and from reports of government authorities.

The statistics relate to disputes which involved stoppages of work in which ten working days or more were lost at the establishments where the stoppages occurred.

Statistics on working days lost per thousand employees are calculated using estimates of employment from the Survey of Employment and Earnings and the Labour Force Survey.

Explanatory Notes and a Glossary are published on pages 6 to 8 of this publication.

TABLE 1. INDUSTRIAL DISPUTES WHICH OCCURRED DURING THE PERIOD: AUSTRALIA(a)

Period	Number of disputes(b)		Employees involved ('000)		Working days lost ('000)
	Commenced in period	Total(c)	Newly involved(d)	Total(c)	
1992 —					
October	59	70	15.0	15.9	19.3
November	57	63	642.5	645.1	603.2

(a) More detailed information by State and industry is available on request. (b) Prior to September 1991 disputes affecting more than one industry and/or State have been counted as separate disputes in each industry and State and in the Australian total. From that time such disputes, while still counted separately in each industry and/or State, are counted just once at the broader industry and Australian level. See paragraph 5 of the Explanatory Notes. (c) Includes disputes not elsewhere categorised.

EXPLANATORY NOTES

Introduction

The statistics in this publication relate to disputes which involved stoppages of work of ten working days or more at the establishments where the stoppages occurred. Ten working days is equivalent to the amount of ordinary time worked by ten people in one day, regardless of the length of stoppage, for example, 3,000 workers on strike for 2 hours would be counted as 750 working days lost (assuming they work an 8 hour day).

2. The statistics of working days lost relate to the losses due to industrial disputes only (as defined in paragraph 2 of the Glossary). Effects on other establishments, such as stand-downs because of lack of materials, disruption of transport services, power cuts, etc. are not included.

3. The statistics of industrial disputes are compiled mainly from data obtained from employers (both private and public sector), from trade unions and from reports of government authorities. Particulars of some stoppages eg. State or Australia wide general strikes may have been estimated and the statistics therefore should be regarded as giving only a broad measure of the extent of industrial disputes as defined above.

Change in methodology

4. The basis for the calculation of working days lost per thousand employees was changed in January 1987 to include estimates of employees from the Survey of Employment and Earnings. They are combined with estimates of the number of employees in agriculture and in private households, obtained from the Labour Force Survey. Estimates have been recalculated on this basis for each month back to June 1984 and are available on request. In issues of this publication prior to January 1987, the estimates of numbers of employees were based entirely on Labour Force Survey data. The effect of the change is minimal at the 'all industries' level but is quite significant, in some cases, for individual industry groups.

5. The basis for the calculation of the number of disputes was changed in the November 1992 publication and the series revised back to September 1991. Prior to September 1991, disputes affecting more than one industry and/or State have been counted as a separate dispute in each industry and State and in the Australian total. From September 1991 onwards, a dispute affecting more than one industry and/or State is counted once in each industry and/or State, but only once at the broader industry and Australia level. The reason for the change was to align the method of counting the number of industrial disputes with the International Labour Office guidelines. This change does not affect the estimates of employees involved or working days lost.

Reliability of estimates

6. Inaccuracies may occur because of imperfections in information provided by respondents or in processing by the ABS. Although considerable care is taken in questionnaire design; in the instructions given to respondents; and in editing the returns; these inaccuracies may occur in any enumeration, whether it be a full count or a sample.

Other ABS publications

7. Users may also wish to refer to the following publications:

Industrial Disputes, Australia (6322.0) — issued annually

Labour Statistics, Australia (6101.0) — issued annually

The Labour Force, Australia, Preliminary (6202.0) — issued monthly

The Labour Force, Australia (6203.0) — issued monthly

Trade Union Statistics, Australia (6323.0) — issued annually

Trade Union Members, Australia, August 1992 (6325.0)

Employed Wage and Salary Earners, Australia (6248.0) — issued quarterly

Award Rates of Pay Indexes, Australia (6312.0) — issued monthly

Unpublished statistics

8. A range of unpublished data is also available on request including dispute details at more detailed industry levels, cross-classified by States/Territories, and finer cause of dispute and method of settlement categories than those published. Considerable time series exist for most variables. Inquiries regarding data availability and associated charges should be directed to Laura Smith on (06) 252 6561.

9. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Symbols and other usages

- r estimates revised since last issue
- nil or rounded to zero

10. Where estimates have been rounded, discrepancies may occur between sums of the component items and totals.

Electronic Services

DISCOVERY. Key *656# for selected current economic, social and demographic statistics.

PC AUSSTATS. Thousands of up-to-date time series are available on this ABS on-line service. For further information phone the PC-AUSSTATS Help Desk on (06) 252 6017.

PC TELESTATS. This service provides:

- foreign trade statistics tailored to users' requirements. Further information is available on (06) 252 5404.
- text and tables for selected Main Economic Indicator publications. Further information is available on (06) 252 5404.

Floppy disk service

Selected ABS statistics are available on floppy disk. Further information is available on (06) 252 6684.

GLOSSARY

Cause of dispute

The statistics of causes of industrial disputes relate to the reported main cause of the stoppage of work and not necessarily all causes that may have been responsible for the stoppage of work. For these reasons, the statistics do not reflect the relative importance of all causes of disputes as perceived by both employers and employees. The causes are classified from information supplied by employers and according to standards determined by the International Labour Organisation. The classification of causes is as follows:

Wages. Claims involving general principles relating to wages e.g. increase (decrease) in wages; variation in method of payment or combined claims relating to wages, hours or conditions of work in which the claim about wages is deemed to be the most important. Combined claims in which other claims are deemed to be the most important are included under the relevant cause. Disputes over award restructuring are included under managerial policy.

Leave, pensions, compensation. Claims involving general principles relating to holiday and leave provisions; pension and retirement provisions; workers' compensation provisions; insertion of penal clause provisions in awards.

Managerial policy. Disputes concerning the exercise of managerial control by employers e.g. terms and conditions of employment (other than disputes specifically about wages and hours); new awards and agreements; award restructuring; work practices; principles of promotion or deployment of staff including roster complaints and retrenchments; disciplinary matters including alleged victimization of union officials; employment of particular persons; disagreement with managerial decisions.

Physical working conditions. Disputes concerning physical working conditions and safety issues e.g. protective clothing and equipment; first aid services; uncomfortable working conditions; lack of, or the condition of, amenities; claims for assistance; shortage or poor distribution of equipment or material; condition of equipment; new production methods and equipment; arduous physical tasks.

Trade unionism. Disputes concerning employment of non-unionists, inter-union and intra-union disputes; sympathy stoppages in support of employees in another industry; recognition of union activities.

Hours of work. Claims involving general principles relating to hours of work e.g. decrease (increase) in hours; distribution of hours.

Other. Disputes concerning protests directed against persons or situations other than those relating to the employer/employee relationship e.g. political matters; fining and gaoling of persons; lack of work; lack of ade-

quate transport; non-award public holidays; accidents and attendance at funerals. Stoppages for which no reason is given are also included in this category.

Disputes

2. For these statistics, an *industrial dispute* is defined as a withdrawal from work by a group of employees, or a refusal by an employer or a number of employers to permit some or all of their employees to work, each withdrawal or refusal being made in order to enforce a demand, to resist a demand, or to express a grievance.

3. A dispute affecting several establishments is counted as a single dispute if it is organised or directed by one person or organisation; otherwise it is counted as a separate dispute at each establishment (in each State or Territory) and in each industry in which it occurred.

4. A dispute affecting more than one industry and/or State is counted once in each industry and State but only once at the broader industry and Australia level. Prior to September 1991 disputes covering more than one industry and/or State were counted differently (refer to paragraph 5 of the Explanatory Notes for details).

5. When there is a return to work between stoppages over the same issue, and the return to work is for less than two complete months, the stoppages are counted as a single dispute. When the return to work is for two or more months, the dispute is considered to have ended at the time of the return to work. Should a subsequent stoppage occur, it is counted as a new dispute.

6. Information is recorded concerning all industrial disputes where ten or more working days are lost (see paragraph 1 of the Explanatory Notes). Included in these statistics are the following types of industrial disputes:

- unauthorised stopwork meetings;
- unofficial strikes;
- sympathetic strikes (e.g. strikes in support of a group of workers already on strike);
- political or protest strikes;
- general strikes;
- work stoppages initiated by employers (e.g. lockouts); and
- rotating or revolving strikes (i.e. strikes which occur when workers at different locations take turns to stop work).

Excluded from these statistics are work-to-rules, go-slows, bans (e.g. overtime bans) and sit-ins. In addition, industrial disputes in which employees resign are deemed to have been resolved. Statistics on those disputes will cease to be collected from the date of the employees' resignations.

Disputes which occurred during the period

7. *Disputes which occurred during the period* encompasses those disputes which:

- started in a previous month or year and ended in the reference period, or
- began and ended in the reference period, or
- began in the reference period and continued into the next period, or
- started prior to the reference month or year, continued through the reference period and into the next period.

Duration of dispute

8. The *duration* of a dispute is the average number of working days lost per employee involved in the dispute. The duration of the dispute is calculated by dividing the total number of working days lost in the dispute by the number of employees involved (both directly and indirectly).

Employees

9. *Employees* refers to wage and salary earners only. Excluded are persons who are self-employed (e.g. building sub-contractors, owner-drivers of trucks) and employers.

10. *Employees directly involved* are those who actually participated in the dispute in order to enforce or resist a demand or to express a grievance.

11. *Employees indirectly involved* are those who ceased work at the establishment where the stoppages occurred, but who are not themselves parties to the dispute. Employees who ceased work at establishments other than those where the stoppages occurred are excluded. See paragraph 2 of the Explanatory Notes.

12. *Total employees involved* for any period of time are obtained by adding together the number of employees involved in each dispute in the period. For any period of time the figures may include details of the same employees involved in more than one dispute. The longer the period of reference, the more chance there is of some double counting in the number of employees involved. Where there are varying numbers of employees involved during the progress of a dispute, the figures of employees involved relate to the largest number of individual employees involved on any one day. Generally, the *total* number of employees involved for each year will equal the sum of the total number of employees involved in the first month of a year plus the number of employees *newly* involved in subsequent months. Differences between monthly and annual totals can occur due to the temporary cessation of stoppages which resume in subsequent months. Employees re-involved in this type of dispute are not classified as employees *newly* involved in stoppages in the second period in which the dispute occurs.

Method of settlement

13. Statistics of the *method of settlement* of industrial disputes relate to the method directly responsible for ending the stoppage of work as reported and not necessarily to the method (or methods) responsible for settling all matters in dispute. For these reasons, they do not reflect the relative importance of the work of various industrial tribunals operating under State and Federal legislation. The classification of method of settlement is as follows:

Negotiation. Private negotiation between the parties involved, or their representatives, without the intervention or assistance of authorities constituted under State or Federal industrial legislation.

State legislation. Intervention or assistance of an industrial authority or authorities created by or constituted under State conciliation and arbitration or wages board legislation, or reference to such authorities or compulsory or voluntary conference. Intervention, assistance or advice of State government officials or inspectors.

Federal and joint Federal-State legislation. Compulsory or voluntary conference or by intervention or assistance, of, or reference to, the industrial relation commissions created by or constituted under the Industrial Relations Act, Coal Industry Acts, Stevedoring Industry Act, and other acts such as the Navigation Act; Public Service Arbitration Act. Intervention, assistance or advice of Federal government officials or inspectors.

Resumption without negotiation. This category may include some disputes which are settled subject to subsequent negotiation of a formal nature, such as industrial court hearings. Stop-work meetings are included, and this category may also include disputes settled by 'resumption' as stated, but about which no further information is available.

Other methods. Mediation; filling places of employees on strike or locked out; closing establishments permanently; dismissal or resignation of employees.

Working days lost

14. *Working days lost* refers to working days lost by employees directly and indirectly involved in the dispute and figures are generally as reported by parties to the dispute. For some disputes working days lost are estimated on the basis of the number of employees involved and the duration of the dispute.

Working days lost per thousand employees

15. *Working days lost per thousand employees* are calculated for the 12 month period from working days lost and estimates of employees obtained from the ABS Survey of Employment and Earnings and the ABS Labour Force Survey. Refer to paragraph 4 of the Explanatory Notes for details of the way in which these measures are calculated, and the change in the method of calculation from 1987.
